

**Figure 5-26**

**Share of world articles in all fields with authors from multiple institutions, domestic-only institutions, and international coauthorship: 2000 and 2013**

NOTES: Article counts refer to publications from a selection of journals, books, and conference proceedings in S&E from Scopus. Articles are classified by their year of publication and are assigned to a region/country/economy on the basis of the institutional address(es) listed in the article. Articles are credited on a whole-count basis (i.e., each collaborating country/economy is credited with one count). Articles with multiple institutions are counts of articles with two or more institutional addresses. Articles with multiple domestic institutions only are counts of articles with more than one institutional address within a single country/economy. Articles with international institutions are counts of articles with institutional addresses from more than one country/economy. See appendix table 5-41.
